Product	NPK Oxide	NPK Elemental	Grade	Features
Andersons Foltec® Chlorofast-S		6-0-0	Professional	Foltec® is the ideal liquid complement to Nutri DG baseline nutrition. New Foltec® Foliar Nutrients are technically advanced to achieve high efficiency absorption and plant tissue feeding. These properties are particularly effective for non-plant mobile nutrients like Iron and Manganese or for periods of high stress or low moisture. Also part of The Andersons A+ Complete Turf Health System™ and TNT Ultra (turf nutrition tool) programme.
Andersons Foltec® Cytozorb-S		4-0-1	Professional	
Andersons Foltec® Fortify		6-0-0	Professional	
Andersons Foltec® Nitroplast		19-1-4	Professional	
Andersons Foltec® Turf-Grade		0-0-18	Professional	
True Foliar® Ca	8-0-4	8-0-3	Pharmaceutical	Long lasting colour, enhanced root development and remarkable stress tolerance. True Foliar® supplies the most advanced organic based foliar turf nutrition which is supplied efficiently through the transcuticular pores and translocated easily through the plant. Efficiency is the key to preventing flushes of growth and having control over the plant nutrients available.

Poa and Poa/Bent Greens	CPR, True Foliar® N, True Foliar® NPK, True Foliar® Si
Sportsfields/Stadia/Fairways	CPR, Fairway 30-0-0, Fairway SeaSequential® and True Foliar® range

Agrichem Foliar Fertilisers

Enhance KCS®	11.0% Si, 7.0% Ca, 5.0% k and 1.7% N
Grocal MGB®	10-0-0 + trace elements
GroFlow 47H®	12-4-22 + humic acid
High NK™	16-5. 5-13 + trace elements
High PK Ultra™	0-18-37
Nitro Humus 323™	32-0-0 + humic acid
Nitro Iron	8-0-0 + 8% Fe, 1% Mn and 5% S
Supa Stand Phos®	6-10-3 + 10% Kelpak

Miscellaneous Foliar Products

Aminogro® Plus	Liquid form amino acids
Dissolvine® E-Fe-13	13% chelated powdered Iron
Extend-it™ 28-0-0	Corrects Nitrogen deficiencies
FeRROMEAC® AC 15-0-0 + 6% Fe	Base product. Extended Nitrogen feeding.
Goëmar® Calibra	GA 142 seaweed filtrate

Andersons Foltec® Chlorofast -S 6-0-0

Plus 2% Mg and 5% Mn

- Bio-enhanced foliar fertiliser
- Contains Seaplant extract and L-amino acids
- Can be used in conjunction with the Foltec range in a programme
- Exact balanced plant nutrient requirements

Suitable for

Benefits

- An ideal addition to The Andersons A+ Complete Turf Health System™ programme.
- Contains Seaplant extracts and L-amino acids.
- Magnesium (Mg) is a component of chlorophyll and therefore of photosynthesis.
- Magnesium deficiencies can occur in low CEC or high pH soils.
- Manganese (Mn) is a critical element in photosynthesis.

General Information

Chlorofast-S contains two different types of Nitrogen along with Magnesium and Manganese. Can be used in an A+ Complete Turf Health System™ programme with Nutri DG granular fertilisers. Designed to be used on turf and ornamental plants, it is a foliar product that is hard to beat for performance. Excellent when used with Cytozorb-S and Fortify in a tournament preparation programme.

Application rates

Apply 10 - 13 L/ha in a minimum of 400 L of water every two weeks or as required.

Pack Size 9.47 L. Shake the container well before use.

Andersons Foltec® Cytozorb-S 4-0-1

Plus 2% Fe and micros (Mg, Mn and Zn)

- Bio-enhanced foliar fertiliser
- Contains Seaplant extract, L-amino acids and a proprietary surfactant
- Can be used in conjunction with the Foltec range in a programme
- Surfactant root growth hormone and Iron in one container

Suitable for

Benefits

- An ideal addition to The Andersons A+ Complete Turf Health System™ programme.
- Control over plant nutrients – low N, no flushes of growth.
- Greatly enhances root growth.
- Unique blend of Seaplant extracts, L-amino acids with a surfactant.
- Greatly relieves stress related to heat, mowing, drought and cold.
- Excellent instant, natural and long lasting colours.

General Information

The new baseline product from The Andersons, Cytozorb-S is the product to use as a stand-alone fertiliser or as the foundation within an A+ Complete Turf Health System™ programme with Nutri DG granular fertilisers. It enhances the plant's resistance to stress, improving root growth, heat and drought tolerance and improves nutrient efficiency. It provides a sustained natural colour and provides all Turf Managers with season long turf health.

Application rates

Apply 20 L/ha in a minimum of 400 L of water every two weeks or as required.

Pack Size 9.47 L. Shake the container well before use.

Andersons Foltec® Fortify 6-0-0

Plus 6% Ca, 0.5% Fe, 0.5% Mn and 0.3% Si

- Bio-enhanced foliar fertiliser
- Contains Seaplant extract and L-amino acids
- Can be used in conjunction with the Foltec range in a programme
- Exact balanced plant nutrient requirements

Suitable for

Benefits

- An ideal addition to The Andersons A+ Complete Turf Health System™ programme.
- Contains Seaplant extracts and L-amino acids.
- Includes 6% Calcium for improved root and shoot growth.
- Provides Iron and Manganese.

General Information

Fortify contains two different types of Nitrogen. Can be used in an A+ Complete Turf Health System™ programme with Nutri DG granular fertilisers. Designed to be used on turf and ornamental plants, it is a foliar product that is hard to beat for performance. Excellent when used with Cytozorb-S and Chlorofast-S in a tournament preparation programme.

Application rates

Apply 10 - 20 L/ha in a minimum of 400 L of water every two weeks or as required.

Pack Size 9.47. Shake the container well before use.

Andersons Foltec® Nitroplast-S 19-1-4 Plus 0.5% Fe and micros (Mn, Zn and Cu)

- Bio-enhanced foliar fertiliser
- Contains Seaplant extract and L-amino acids
- Can be used in conjunction with the Foltec range in a programme

Suitable for

Benefits

- An ideal addition to The Andersons A+ Complete Turf Health System™ programme.
- Greatly enhances root growth.
- Unique blend of Seaplant extracts, L-amino acids.
- Greatly relieves stress related to heat, mowing, drought and cold.
- Excellent instant, natural and long lasting colours.

General Information

Nitroplast-S contains three different types of Nitrogen. Can be used in an A+ Complete Turf Health System™ programme with Nutri DG granular fertilisers. Designed to be used on turf and ornamental plants, it is a foliar product that is hard to beat for performance.

Application rates

Apply 10 L/ha in a minimum of 400 L of water every two weeks or 15 L/ha when required.

Pack Size 9.47 L. Shake the container well before use.

Andersons Foltec® Tur-Gade 0-0-18 Plus 0.5% Fe and Mn

- Bio-enhanced foliar fertiliser
- Contains Seaplant extract and L-amino acids
- Can be used in conjunction with the Foltec range in a programme
- Exact balanced plant nutrient requirements

Suitable for

Benefits

- An ideal addition to The Andersons A+ Complete Turf Health System™ programme.
- An ideal product to provide essential Potassium and micronutrients.
- Contains Seaplant extracts and L-amino acids for enhanced drought and disease tolerance.
- Potassium leaches out of leaves as well as the root zone, so this product is ideal for topping up nutrients.

General Information

Tur-Gade is a Potassium acetate product for correcting Potassium deficiencies and is vital for stress tolerance. Can be used in an A+ Complete Turf Health System™ with Nutri DG granular fertilisers. Designed to be used on turf and ornamental plants, it is a foliar product that is hard to beat for performance. Excellent when used with Cytozorb-S and Fortify in a tournament preparation programme.

Application rates

Apply 10 - 13 L/ha in a minimum of 400 L of water every two weeks or as required.

Pack Size 9.47 L. Shake the container well before use.

True Foliar® Ca 8-0-4 (8-0-3)

With 8% Ca and B

- Pharmaceutical grade True Foliar®
- Absorbed through transcuticular pores and stomata openings
- Complete feeding foliar supply. Exact balanced plant nutrient requirements
- Can be used in conjunction with CPR and other True Foliar® products in a programme

Suitable for

Benefits

- Calcium assists in stomata opening which aids in increased uptake.
- Calcium assists in cell division and the efficient use of carbohydrates.
- Relieves deficiencies of Calcium often found in sandy or low CEC soils.
- Most advanced organic based turf nutrient feeding currently available.
- Controlled sustained feeding – no flushes of growth.
- Greatly relieves stress related to heat, mowing, drought and cold.

General Information

True Foliar® Ca contains two forms of Nitrogen along with Calcium and Boron combined in an ideal balanced formulation. Can be used in a programme with CPR and other True Foliar® products. This product is a premium grade foliar fertiliser which is hard to beat for performance.

Application Rates

Apply 10 L/ha in a minimum of 400 L/ha water every two weeks over the summer "season".

Pack Size: 9.47 litres. Shake the container well before use.

True Foliar® K 2-0-16

With turf micronutrients (2-0-13)

- Pharmaceutical grade True Foliar®
- Absorbed through transcuticular pores and stomata openings
- Complete feeding foliar supply. Exact balanced plant nutrient requirements
- Can be used in conjunction with CPR and other True Foliar® products in a programme

Suitable for

Benefits

- Potassium leaches out of leaves as well as the root zone.
- Potassium in True Foliar® K is in an organic matrix which lowers the leaf leaching potential.
- Contains added fulvic acid, amino acids and biostimulants.
- Controlled sustained feeding – no flushes of growth.
- Greatly relieves stress related to mowing, heat and drought.

General Information

True Foliar® K features three different types of Nitrogen and multiple forms of Potassium vital for stress tolerance. Can be used in a programme with CPR and other True Foliar® products. This product is a premium grade foliar fertiliser which is hard to beat for performance.

Application Rates

Apply 10 L/ha in a minimum of 400 L/ha water every two weeks over the summer "season".

Pack Size: 9.47 litres. Shake the container well before use.

True Foliar® MgMn (Magman) 6-0-0

Plus 2% Mg and 5% Mn

- Pharmaceutical grade True Foliar®
- Absorbed through transcuticular pores and stomata openings
- Complete feeding foliar supply. Exact balanced plant nutrient requirements
- Can be used in conjunction with CPR and other True Foliar® products in a programme

Suitable for

Benefits

- Magnesium (Mg) is a component of chlorophyll and therefore of photosynthesis.
- Magnesium is also critical in metabolic functions including cell respiration.
- Magnesium deficiencies can occur in low CEC or high pH soils.
- Manganese (Mn) is a critical element in photosynthesis.
- True Foliar® feeding is very effective in restoring the correct balance of these two elements.
- Contains seaweed extract which provides vitamins, amino acids, cytokinins and other proprietary biostimulants.

General Information

True Foliar® MgMn contains two forms of Nitrogen along with Sulphur, Magnesium and Manganese combined in an ideal ratio. Can be used in a programme with CPR and other True Foliar® products. This product is a premium grade foliar fertiliser which is hard to beat for performance. Excellent when used in conjunction with CPR and True Foliar® Si in a tournament preparation programme.

Application Rates

Apply 10 L/ha in a minimum of 400 L/ha water every two weeks over the summer "season".

Pack Size: 9.47 litres. Shake the container well before use.

True Foliar® N 19-1-6 (19-1-15)

Plus 1.2% Fe

- Pharmaceutical grade True Foliar®
- Absorbed through transcuticular pores and stomata openings
- Complete feeding foliar supply. Exact balanced plant nutrient requirements
- Can be used in conjunction with CPR and other True Foliar® products in a programme

Suitable for

Benefits

- True Foliar®, fast absorption and translocation – efficient use of nutrients.
- Amongst the most advanced organic based turf nutrition feeding available.
- Controlled sustained feeding – no flushes of growth.
- Contains Seaplant extract which provides vitamins, amino acids and cytokinins and other propriety biostimulants.
- Greatly relieves stress related to heat, mowing and drought.

General Information

True Foliar® N is the only product currently on the market to feature four different types of Nitrogen from five sources, the only True Foliar® containing available Phosphate, and has multiple forms of Potassium unique to Emerald Isle products. Can be used in a programme with CPR and the full True Foliar® range. This product is a premier grade foliar fertiliser which is hard to beat for performance.

Application Rates

Apply 10 L/ha in a minimum of 400 L/ha water every two weeks or as required.

Pack Size: 9.47 litres and 57 litres. Shake container well before use.

True Foliar® NPK Plus 10-3-16 (10-1-13) Plus P

- Pharmaceutical grade True Foliar®
- Absorbed through transcuticular pores and stomata openings
- Complete feeding foliar supply. Exact balanced plant nutrient requirements
- Best used in conjunction with CPR and other True Foliar® products in a programme
- Contains Phosphite

Suitable for

Benefits

- Phosphite assists in disease resistance.
- Phosphite breaks down to elemental Phosphorus as a nutrient.
- The Phosphorus is held in the plant (rather than being leached).
- Only True Foliar® Phosphite with seaplant extract currently available.
- Contains added fulvic acid, amino acids and biostimulants.
- Controlled sustained feeding – no flushes of growth.
- Greatly relieves stress related to heat, mowing and drought.

General Information

True Foliar® NPK, along with substantial amounts of N, P and K, also contains a unique blend of Phosphite, Seaplant extract and fulvic acid. Can be used in a programme with CPR and other True Foliar® products. This product is a premium grade foliar fertiliser which is hard to beat for performance.

Application Rates

Apply 10 L/ha in a minimum of 400 L/ha water every two weeks over the summer “season”.

Pack Size: 9.47 litres. Shake the container well before use.

True Foliar® Si 3-0-10 (3-0-8)

With 1% Si (water soluble Si from Sodium Silicate)

- Pharmaceutical grade True Foliar®
- Absorbed through transcuticular pores and stomata openings
- Can be used in conjunction with CPR and other True Foliar® products in a programme
- Excellent for adjusting ball-roll speed on greens

Suitable for

Benefits

- Strengthens the rigidity of turfgrass leaves (excellent for greens pre-tournament).
- Assists in more “upright” growth and more accurate ball roll.
- Improves stress and disease tolerance.
- Contains seaweed extract which provides vitamins, amino acids, cytokinins and other proprietary biostimulants.
- Controlled sustained feeding – no flushes of growth.
- Greatly relieves stress related to mowing, heat and drought.

General Information

True Foliar® Si features two different types of Nitrogen and multiple forms of Potassium unique to Emerald Isle products. Silica helps to strengthen turfgrass leaves for improved turfgrass stress tolerance, and assists in more accurate ball roll speed. Can be used in a programme with CPR and other True Foliar® products. This product is a premium grade foliar fertiliser which is hard to beat for performance. Excellent when mixed with CPR and True Foliar® MgMn in a tournament preparation programme.

Application Rates

Apply 10 L/ha in a minimum of 400 L/ha water every two weeks over the summer “season”.

Pack Size: 9.47 litres. Shake the container well before use.

CPR 4-0-1 (4-0-1)

Plus 2% Fe (chelated)

- CPR stands for Colour, Performance, Roots
- Pharmaceutical grade True Foliar®
- Absorbed through transcuticular pores
- Can be used in conjunction with True Foliar® range in a programme
- Surfactant root growth hormone and Iron in one container

Suitable for

Benefits

- True Foliar®, fast absorption and translocation – efficient use of nutrients.
- Control over plant nutrients – low N, no flushes of growth.
- Greatly enhances root growth.
- Unique blend of PanaSeá Plus, SeaSequential® Micronutrient Complex and proprietary aquatrols surfactants.
- Greatly relieves stress related to heat, mowing, drought and cold.
- Excellent, instant, natural, long lasting colour.
- Amongst the highest levels of cytokinins on the market.

General Information

CPR helps turf in three major ways: it enhances root growth and stress tolerance, it adds a premium wetting agent to assist in turf absorption, and it dramatically lifts turf performance and provides a sustained natural colour response. Can be used in a programme with the True Foliar® range. This product is a premier grade foliar fertiliser which is hard to beat for performance.

Application Rates

Apply 20 L/ha in a minimum of 400 L/ha water every two weeks or as required.

Pack Size: 9.47 litres and 57 litres. Shake the container well before use.

Fairway 30-0-0 (30-0-0 Oxide)

Plus 10% kelp extract

- Three types of Nitrogen
- Contains 10% kelp extract (from Nova Scotia "Rock Weed")
- Can be used in conjunction with CPR and Fairway SeaSequential®

Suitable for

Benefits

- Used with Fairway SeaSequential® and CPR these products apply about 10 kg Nitrogen per hectare per month for controlled growth.
- Each application includes a generous amount of seaplant extract, fulvic acid and minor nutrients.
- Excellent natural colour which lasts for 3 weeks.
- Greatly assists in stress tolerance and disease resistance.

General Information

Emerald Isle Fairway nutrient products and programmes combine the benefits of a superior Seaplant and fulvic acid with quality macro and micro (chelated) nutrients. The nutrition programme helps to improve the physiological fitness of the turf and it provides great long lasting natural colour which lasts the full 3 weeks. Colour that lasts is a clear sign of healthy turf that is stress free and disease resistant. Can be added to the True Foliar® programmes to increase Nitrogen longevity.

Application Rates

Apply 20 L/ha in a minimum of 400 L/ha water every three weeks.

Pack Size: 57 litres. Shake the container well before use.

Fairway SeaSequential® 6-0-2 (6-0-1)

- Can be used in conjunction with CPR and Fairway 30-0-0
- Excellent product for stadia and fairway applications

Suitable for

Benefits

- Used with Fairway 30-0-0 and CPR these products apply about 10 kg Nitrogen per hectare per month for controlled growth.
- Excellent natural colour which lasts for 3 weeks.
- Greatly assists in stress tolerance and disease resistance.

General Information

Emerald Isle Fairway nutrient products and programmes combine the benefits of a superior seaplant and fulvic acid with quality macro and micro (chelated) nutrients. The nutrition programme helps to improve the physiological fitness of the turf and it provides great long lasting natural colour which lasts the full 3 weeks. Colour that lasts is a clear sign of healthy turf that is stress free and disease resistant.

Application Rates

Apply 20 L/ha in a minimum of 400 L/ha water every three weeks.

Pack Size: 57 litres. Shake the container well before use.

Enhance KCS®

11.0% Si, 7.0% Ca, 5.0% K, 1.7% N

- Moderates plant response to salinity and high levels of Sodium Chloride in the soil
- Reduces turfgrass tolerance in dry soils
- Increases cutability, ball-roll and speed on greens
- Increases SAR (Systemic Acquired Resistance) response to pests and diseases
- Neutral pH compared with other Silica formulations, increases compatibility
- Controlled release suspension
- Free flowing formulation makes it easy to decant into spray equipment, mixing tanks and irrigation

Concentrated Calcium, Silica, Sulphur and Potassium suspension to increase turfgrass tolerance to salinity and improve heat, disease and pest resistance.

Application Rates

6-8 L/ha in at least 400 L of water per hectare. Apply as required using the rate best suited to the programme you are incorporating this product into.

Pack Size: 10 litres

**ENHANCE
KCS**

Grocal MGB®

NPK 10-0-0 +17% Ca, 4% Mg, 0.1% B

- Calcium emphasised formulations containing Nitrogen, Magnesium and trace elements
- Improves turfgrass health and firmness through enhanced cell strength and structure
- Added Magnesium improves chlorophyll production for optimum greening
- Premixed in carefully controlled ratios so the turf receives key plant tissue elements for health, strength, colour and growth
- Completely soluble and plant available, delivering the required quantity of nutrients with low application rates
- Compatible with a wide range of other agricultural chemicals and foliar fertilisers

Assists with Calcium's normally poor mobility within the turf by targeting Calcium directly to where it is most required. Improves disease resistance through enhanced cell strengthening but still allows nitrogen to grow the turf. The unique combination of Calcium and Magnesium in conjunction with added Nitrogen and trace levels of Boron is an ideal formulation for regular application to turfgrass to ensure plant tissue levels of these key elements are maintained.

Application Rates

10-20 L/ha in at least 400 L of water per hectare. Apply as required using the rate best suited to the programme you are incorporating this product into.

Pack Size: 20 litres

**GROCAL
MGB**

GroFlow 47H®

NPK 12-4-22 + humic acid

- Contains a blend of major nutrients with emphasis on Potassium
- Completely soluble and plant available, delivering the required quantity of nutrients with low application rates
- Contains humic acid to enhance nutrient uptake and improve soil health
- Premixed in carefully controlled ratios enabling the turf to receive the essential nutrients specific to seasonal requirements
- Compatible with a wide range of other agricultural chemicals and foliar fertilisers

Ideal for turf hardening in high traffic areas or for reviving stressed turf during periods of physiological climatic stress. Recommended and best suited in combination with other Agrichem products in a full foliar programme.

Application Rates

10-20 L/ha in at least 400 L of water per hectare. Apply as required using the rate best suited to the programme you are incorporating this product into.

Pack Size: 20 litres

High NK™

NPK 16-5.5-13 + trace elements

- High analysis reduces quantity required providing application and cost savings
- Soluble form facilitates turfgrass uptake and minimises wastage
- Solution is highly plant available which assists in the rapid correction of deficiencies
- Clear liquid formulation makes it easy to decant into spray equipment, mixing tanks and irrigation
- Compatible with a wide range of other agricultural chemicals and foliar fertilisers

NPK solution for maintaining growth and rapidly correcting Nitrogen and Potassium deficiencies.

Application Rates

10-20 L/ha in at least 400 L of water per hectare. Apply as required using the rate best suited to the programme you are incorporating this product into.

Pack Size: 20 litres

High PK Ultra™

NPK 0-18-37

- Contains high levels of Phosphorus to drive energy transfer cycles during peak use periods
- Contains high levels of Potassium to improve turfgrass durability, colour and quality
- Phosphorus and Potassium ratio reduces senescence in turfgrass
- High concentration reduces quantity of product needed
- Free flowing formulation makes it easy to decant into spray equipment, mixing tanks and irrigation
- Can be applied with a wide range of pesticides

The world's highest PK analysis liquid formulation for turfgrass.

Application Rates

10 L/ha in at least 400 L of water per hectare. Apply as required using the rate best suited to the programme you are incorporating this product into.

Pack Size: 20 litres

**HIGH
PK ULTRA**

Nitro Humus 323™

NPK 32-0-0 + humic acid

- Readily available Nitrogen complexed with humic acid for optimum turf uptake
- High absorption rate provides excellent Nitrogen use efficiency – no follow up irrigation required after application
- Excellent efficiency of Nitrogen supply due to varying forms of N content
- Free flowing formulation makes for ease of decanting into spray equipment
- Compatible with a wide range of other agricultural chemicals and foliar fertilisers

A highly concentrated liquid Nitrogen and humic acid solution ideal for boosting Nitrogen levels, turf growth and overall vigour. Recommended and best suited in combination with other Agrichem products in a full foliar programme.

Application Rates

10-20 L/ha in at least 400 L of water per hectare. Apply as required for general growth maintenance using the rate best suited to the programme you are incorporating this product into.

Pack Size: 20 litres

**NITRO
HUMUS
323**

Nitro Iron

NPK 8-0-0 + 8% Fe, 5% S, 1% Mn

- Contains readily available Iron and Manganese for rapid uptake and correction of deficiency symptoms
- Contains additional Nitrogen for facilitating uptake and maintaining turf growth
- Provides long lasting and enhanced greening in turf greens
- Stable formulation
- Compatible with a wide range of other agrichemicals

Nitro Iron is a readily available, reliable liquid-Iron formulation designed to correct Iron deficiencies and maintain turf growth. Iron is important for turf development as it is required for chlorophyll production. Both Iron and Manganese are required to activate several plant enzymes responsible in photosynthesis and respiration.

Application Rates

10-20 L/ha in at least 400 L of water per hectare. Apply as required using the rate best suited to the programme you are incorporating this product into.

Pack Size: 20 litres

**NITRO
IRON**

Supa Stand Phos[®]

NPK 6-10-3 + 10% Kelpak

- An effective starter fertiliser for promoting development of root systems and early turfgrass growth
- Develops larger, more vigorous root systems through a unique combination of plant hormones and NPK
- Suitable for various applications specifically during and post renovation, and through the first 6 - 8 weeks of growth
- The included phosphite form of Phosphorus enhances plant immunity to disease pathogens that affect new roots
- Added organic matter to improve soil structure and increase nutrient uptake
- Free flowing formulation makes it easy to decant into spray equipment, mixing tanks and irrigation tanks

Supa Stand Phos[®] contains critical plant hormones (auxins and cytokinins) in a ratio which assists in the stimulation of turf seed germination and root growth

Application Rates

10-20 L/ha in at least 400 L of water per hectare. Apply as required using the rate best suited to the programme you are incorporating this product into.

Pack Size: 20 litres

**SUPA
STAND
PHOS**

Aminogro® Plus

- Described as a “Vitamin pill” for turf
- Liquid form amino acid marine protein and marine algae extract – plus iron
- Liquid form amino acids (unlike synthetic nutrients) are readily available and useable by plants
- Amino acids are the building blocks of proteins. Aminogro® Plus assists in stress tolerance, disease control, plant health, root development, and microbial activity
- Excellent companion product with Mycorrcin and Digester

Application Rates

Area to be applied	Application Type	Rate
Greens and tees:	Renovation	20 L/ha – 2 days before and immediately after renovation
Greens and tees:	Maintenance	10 L/ha – every 1-4 weeks depending on turf stress
Fairways and stadia:		20 L/ha – monthly, year-round

Pack Size: 10 litres

Dissolvine® E-Fe-13

Chelated 13% Fe

- Immediate entry to plants
- Easy to mix powdered formulation
- Excellent addition to foliar programmes
- Very competitive Iron product

Chelated powdered 13% Iron product which dissolves easily in water and is instantly available to plants. Dissolvine® is an excellent partner product in programmes where a chelated Iron will significantly help.

Application rates

5-10 kg/ha in at least 400 L/ha of water. Use this rate for the programme you are incorporating this product into.

Pack Size: 25 kg

Extend-It™ 28-0-0

- Enhances growth and corrects Nitrogen deficiencies
- Excellent source of slow release foliar Nitrogen
- Extends controlled release of Nitrogen (with no Nitrogen “spike”)
- Increased translocation and remobilisation of Nitrogen
- Reduced leaching

Application Rates

Apply 10-40 L/ha during periods of active growth.

Pack Size: 10 litres

FeRRROMECC® AC 15-0-0

Plus 6% Fe

- Premium turf iron product for premium performance
- Soluble Nitrogen and Iron mix (Nitrogen assists absorption into the plant)
- Very rapid green-up and sustained colour
- Best applied to turf in good health
- Recommended to mix with a non-ionic surfactant (at label rates) when applying without other products with sticker included in them
- Non-burning when used at recommended rates

Application Rates

10 L/ha in 200-400 L of water/ha.

Repeat applications as seasonal requirements dictate.

Pack Size: 9.47 litres

Goëmar® Calibra

GA 142 Seaweed Filtrate

A specially harvested seaweed variety, *Ascophyllum nodosum*, utilising a patented process by Goëmar in France. The powerful plant stimulation properties of the seaweed are retained to produce GA 142 Seaweed Filtrate.

Suitable for

Benefits

- Stimulates enzymes involved in Nitrogen, Phosphate and Iron nutrition.
- Improves leaf quality.
- Stimulates root growth.
- Improved nutrient and moisture uptake from the soil.
- Improved tolerance to stress.

General Information

A high performance liquid seaweed filtrate which provides phyto-hormones and vitamins for healthy grass growth, colour and increased environmental stress tolerance levels. When roots need nutrients, phyto-hormones signal enzymes to transport nutrients from the leaves to the roots, but they are captured at the growing point located at the base of the leaves; the area of most demand for energy and nutrients. This is the reason roots die back during the summer. The extra hormones in Goëmar® Calibra activate more enzymes that enable nutrients to get past this leaf factory and down to the roots, producing a higher root mass during the summer which leads to healthier turf.

Application rates

Greens and turf areas: 0.5 to 3 L/ha.

Bowling greens: 250 - 300 ml per full green.

Note: Goëmar® Calibra is compatible with most common fungicides and insecticides.

Pack Size: 10 litres
